

★ **New idea of thumb picks "TAB Special"**
US and Japan patented product

TAB Special is assembled in two parts. This thumb pick with a breakthrough idea is ideal for guitarists from all genres who play fingerpicking style!

- **Four major characteristics of "TAB Special"**
 1. No slipping, no movement. It is a good fit since rubber material is positioned to the side of fingernail.
 2. It is designed to fit any finger size as it is adjustable.
 3. Promotes a clear sound through the slit opening and springy design features.
 4. No catching of strings is caused by inner side of thumb pick as with traditional thumb picks.

Caution
・ Keep them in a place inaccessible to children.
・ The Thumb pick is to be used for only playing instruments such as the guitar.
・ Note that the pick belt can be cut and adjusted when it is pulled strongly.

★ **Ceramic Bottleneck Slide bar "GIANT BONE BAR"**

This is the what ultimate bottle neck slide bar.
We highly recommend to all slide players of acoustic and electric guitars.

- **Major characteristics of "GIANT BONE BAR"**
 1. Outstanding play from covering all the strings to single string playing.
 2. Ceramics and porcelain gives you impressive vibrancy from clear to mellow sound.
 3. The smooth edge of both ends, reduces noise when you play multiple strings.
 4. Smooth slide playing as only ceramics can achieve.
 5. Great vibrato and sustain from its moderate weight.

Caution
・ The slide bar may be broken by strong impact or dropping as it is ceramics. In case of breakage - caution is needed as fragments could be sharp and care is needed in its disposal.
・ It is not allowed to be used for any purpose other than play instruments such as guitar.
・ Keep them in a place inaccessible to children.
・ Each slide bar is handmade and as such there may be variations in finish. However, this will not diminish playability.
